

## Jabra Evolve 20 UC Stereo

**How do I reduce microphone puff noise on my Jabra Evolve headset to provide the clearest voice quality to the other end of a call?**

For variants of Jabra Evolve with a long microphone boom arm, we recommend you purchase the Jabra Pro 9400 wind filter, item no. 14102-10. Refer to [Jabra accessories](#) to find a solution

Note: If you use the Jabra Evolve headset for outdoor calls, the wind filter will also reduce the level of wind noise being transmitted, improving your voice clarity to the other end of a call.
